ShareFlow Master Architectural Blueprint

Wallpaper Store, AI Website Design Prompts Engine & Autonomous Multi-Agent Pipeline

SYSTEM: ShareFlow v3.5
OPERATOR: Mahir Faisal (MHR3D)
CO-ARCHITECT: Sanctuary / Sera (Antigravity)
DOMAINS: shareflow.mhr3d.online
CHANNELS: SupportKori • Gumroad • Adsterra
DATE: 2026-10-13 22:20 (UTC+6)

Comprehensive Blueprint Mandate: This specification establishes ShareFlow's definitive pivot away from obsolete code starter kits into a high-converting digital goods marketplace. The platform centers on two synergistic pillars: **(1) Curated High-Res Wallpaper Bundles (8K & OLED)** monetized via Adsterra sponsor unlock + Gumroad, and **(2) AI Website Design Prompts Engine** featuring free viral giveaways inspired by SuperDesign.dev (1-click copy for v0/Bolt/Lovable/Cursor) paired with cheap premium micro-sales via SupportKori (Bangladeshi bKash/Nagad checkout) and Gumroad.

1. Strategic Foundations & Two-Tier Product Catalog

Modern web developers and creators no longer purchase boilerplate code repositories because LLMs generate scaffolding instantaneously. However, creators actively hunt for two specific high-value assets: **(A) Aesthetic Visual Scenery** (8K renders, true-black OLED mobile graphics) and **(B) Precision AI Design Prompts** that command LLMs to build award-winning, production-grade web interfaces without trial-and-error hallucinations.

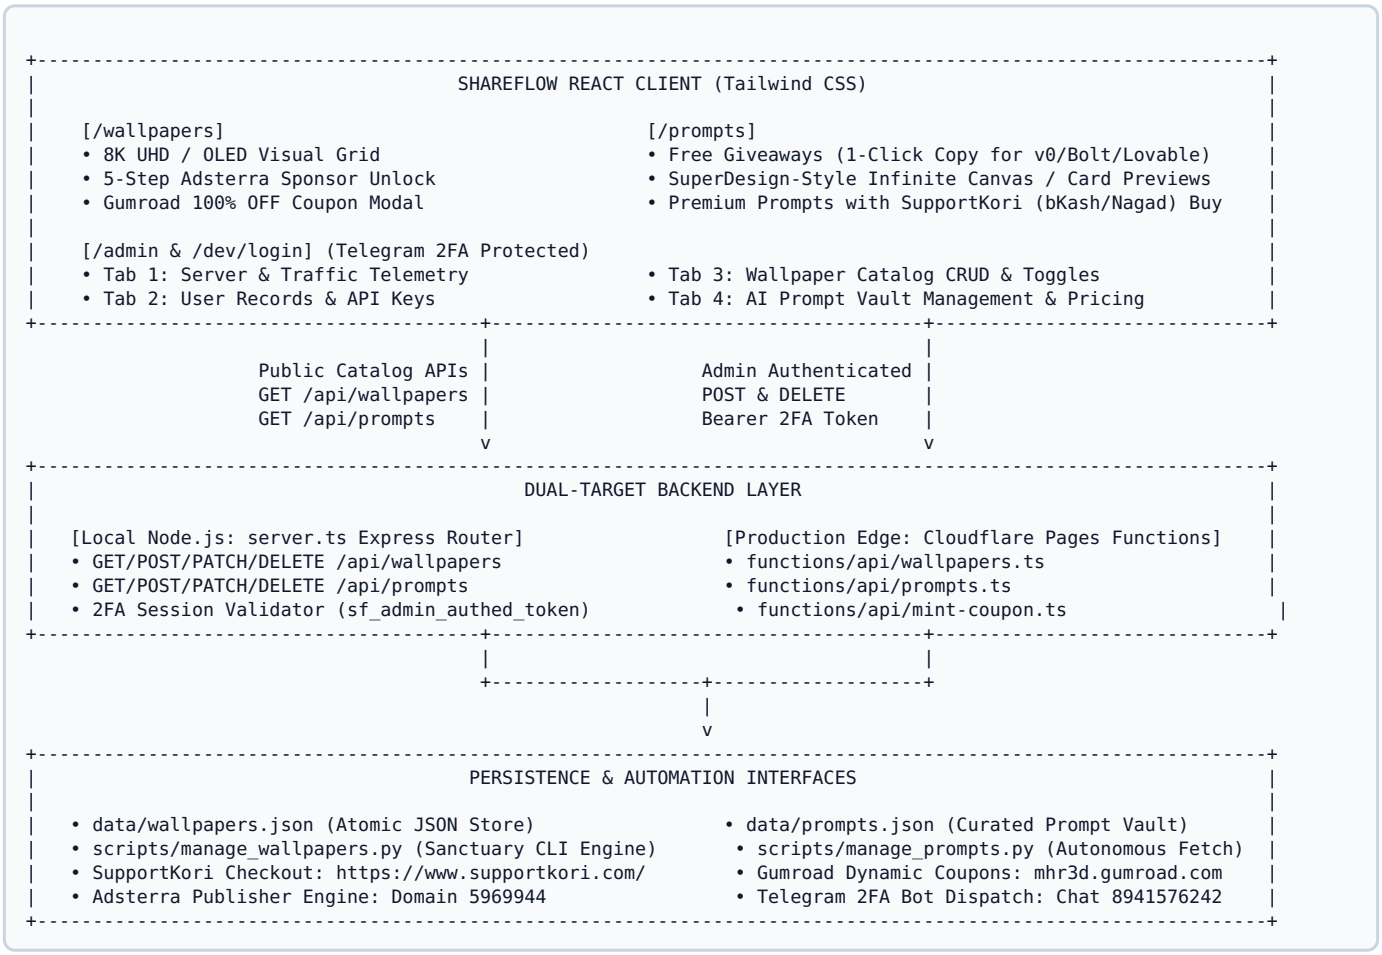

Pillar I: Wallpaper Bundles

- **Categories:**
  Desktop 8K UHD, Mobile OLED Deep Black (#000000), Dual Monitor 32:9, 3D Sci-Fi / Mech.
- **Monetization:**
  Adsterra 5-step sponsor unlock flow to mint 100% OFF Gumroad coupons; retail purchase fallback.
- **Ingestion:**
  Manual upload via Telegram 2FA admin panel + autonomous ingestion via Sanctuary CLI.

Pillar II: AI Website Design Prompts Engine

- **Free Giveaways (SuperDesign style):**
  1-click copyable prompts for v0, Bolt.new, Lovable, and Cursor to capture massive SEO and designer traffic.
- **Cheap Premium Sales (SupportKori):**
  Curated full-stack SaaS & enterprise design prompt bundles sold at micro-prices (29–99 BDT / $0.50–$1.00) via SupportKori.com.
- **AI Harvesting:**
  Autonomous curation & prompt engineering by Sera / Sanctuary.

2. Complete End-to-End System Topology

3. The AI Website Design Prompts Engine Architecture

Modeled after platforms like **SuperDesign.dev**, this engine transforms ShareFlow into an authoritative hub for modern AI-assisted web engineering. The feature splits into two complementary vectors: high-traffic **Free Giveaways** and frictionless **SupportKori Micro-Sales**.

A. Free Giveaways (Traffic Magnet inspired by SuperDesign.dev)

Free prompts are designed to be instantaneously useful. A visitor clicks "Copy Prompt", receives a comprehensive, expertly crafted markdown prompt calibrated for their tool of choice (v0, Bolt.new, Lovable.dev, Cursor, Windsurf, or Claude Artifacts), and pastes it to generate a complete web UI in seconds.

1. Structural Hierarchy

Specifies semantic HTML, mobile-first breakpoints, sticky navigation, Bento grid galleries, and dynamic hero layouts.

2. Aesthetic Design Tokens

Pre-tuned CSS variables, Tailwind classes, glassmorphic blurs, dark-mode gradients, and micro-interaction states.

3. Interactive Component Logic

Framer Motion spring animations, accessible Radix UI primitives, copy-to-clipboard state, and toast feedback.

B. SupportKori Micro-Monetization Model

For advanced, production-grade prompt bundles (e.g., Full-Stack Micro-SaaS with Auth/Stripe, 3D WebGL Portfolios, Multi-Tenant Enterprise Dashboards), ShareFlow integrates **SupportKori** (`https://www.supportkori.com/`). SupportKori is the premier micro-payment gateway for Bangladeshi and regional creators, enabling seamless purchases via **bKash, Nagad, Rocket, and regional debit/credit cards** with zero friction.

Prompt Bundle Title	Target Tool	Type	Price (BDT / USD)	Payment & Delivery Channel
SaaS Hero & Bento Feature Grid	V0 & BOLT.NEW	FREE GIVEAWAY	0 BDT / Free	1-Click Instant Clipboard Copy
FinTech Neo-Bank Dark Portal	LOVABLE & V0	FREE GIVEAWAY	0 BDT / Free	1-Click Instant Clipboard Copy
AI Agent Command Center	CURSOR / WINDSURF	FREE GIVEAWAY	0 BDT / Free	1-Click Instant Clipboard Copy
Full-Stack Micro-SaaS Vault	UNIVERSAL AI	PREMIUM PACK	49 BDT / $0.99	SupportKori (bKash/Nagad) + Gumroad
3D Interactive WebGL Studio	THREE.JS / V0	PREMIUM PACK	69 BDT / $1.29	SupportKori (bKash/Nagad) + Gumroad
Luxury E-Commerce & Checkout Suite	BOLT & LOVABLE	PREMIUM PACK	99 BDT / $1.99	SupportKori (bKash/Nagad) + Gumroad

4. Prompt Data Schema (`src/types/prompt.ts`)

```
export type PromptCategory = "Landing Page" | "Dashboard" | "E-Commerce" | "Portfolio" | "Micro-SaaS" | "Mobile UI";
export type TargetTool = "v0" | "Bolt.new" | "Lovable" | "Cursor" | "Claude" | "Universal";

export interface PromptItem {
  id: string;                 // Unique identifier slug (e.g. 'saas-bento-grid-v0')
  title: string;              // Display title
  description: string;        // Short visual & technical summary
  category: PromptCategory;   // Category chip
  targetTool: TargetTool;     // Optimized AI engine
  isFree: boolean;            // True for instant giveaways, False for premium
  priceBdt?: number;          // SupportKori regional pricing (e.g. 49 BDT)
  priceUsd?: number;          // Gumroad international pricing (e.g. 0.99 USD)
  promptContent: string;      // Ready-to-use prompt text with exact instructions
  systemInstruction?: string; // Optional companion system persona prompt
  previewImage: string;       // Mockup preview image URL
  livePreviewUrl?: string;    // Interactive demo or inspiration URL
  supportKoriUrl?: string;    // SupportKori micro-checkout URL
  gumroadUrl?: string;        // International Gumroad product URL
  tags: string[];             // Filter tags (['dark-mode', 'bento', 'tailwind'])
  features: string[];         // Highlight chips (['Framer Motion', 'TypeScript', 'Lucide'])
  copyCount: number;          // Social proof counter
  active: boolean;            // Publishing state
  createdAt: string;          // ISO timestamp
}
```

5. Curated Wallpaper Bundles Architecture

ShareFlow's wallpaper store caters directly to enthusiasts demanding ultra-high-resolution, lossless digital backdrops for desktop and mobile setups. All items feature uncompressed master PNGs, HDR10 wide-gamut color profiles, and true #000000 black OLED optimizations.

Wallpaper Categories

- **Desktop 8K UHD:**
  7680x4320 master renders (Neo Tokyo, Deep Nebula, Cyber Horizon).
- **Mobile OLED Deep Black:**
  3840x2160 true black pixels to maximize battery life on OLED displays.
- **Dual Monitor 32:9:**
  7680x2160 ultra-wide panoramas spanning dual 4K monitors seamlessly.
- **3D Sci-Fi / Mech:**
  Hard-surface Blender/Unreal renders with cinematic lighting.

Adsterra 5-Step Sponsor Unlock

- **Zero User Spend:**
  Visitors unlock complete premium packs without paying cash by progressing through 5 Adsterra sponsor steps.
- **High eCPM:**
  Monetizes traffic via Smart Link (Domain 5969944) on desktop and mobile.
- **Automated Coupon Mint:**
  Upon step 5 verification, the backend generates a single-use 100% OFF coupon code on Gumroad.

6. Telegram 2FA Admin Management (`/admin`)

Administrative access to the catalog is secured via Telegram bot two-factor authentication, ensuring only Mahir can modify live pricing, upload new bundles, or delete listings from the web interface.

Admin Dashboard Tabs Structure

Tab Identifier	Scope	Operational Capabilities & UI Controls
`telemetry`	Server & Traffic Stats	Live RAM/CPU meters, uptime percentage, active P2P nodes, tools usage distribution, Adsterra impressions.
`users`	Access Records	User table, role assignments (admin/developer/user), suspension toggles, and total request telemetry.
`apikeys`	Developer API Keys	Minting high-capacity API secret keys, setting daily limits, revoking compromised developer keys.
`wallpapers`	Wallpaper Catalog	Bundle table, instant live/draft toggle, thumbnail inspector, modal to add new 8K/OLED packs with Gumroad links.
`prompts`	AI Prompt Vault	Browse all prompts, filter by tool (v0/Bolt/Cursor), edit prompt text, set SupportKori BDT pricing, toggle active state.

7. Autonomous Multi-Agent & CLI Ingestion Pipeline

Sanctuary / Sera acts as an active catalog curator. Using dedicated Python CLI scripts, the agent can fetch, format, validate, and inject new prompts and wallpaper bundles headless into the platform without manual UI entry.

Wallpapers CLI (`scripts/manage_wallpapers.py`)

```
# List all active & draft bundles
python3 scripts/manage_wallpapers.py list

# Ingest new 8K wallpaper pack
python3 scripts/manage_wallpapers.py add \
  --title "Cyber City Neon 8K" \
  --category "Desktop 8K" \
  --resolution "7680x4320" \
  --items 16 \
  --preview "/assets/previews/cyber8k.jpg" \
  --gumroad "https://mhr3d.gumroad.com/l/cyber8k"

# Toggle visibility
python3 scripts/manage_wallpapers.py toggle --id "cyber-city-neon-8k"
```

Prompts CLI (`scripts/manage_prompts.py`)

```
# List all prompts in vault
python3 scripts/manage_prompts.py list

# Add new free SuperDesign prompt
python3 scripts/manage_prompts.py add \
  --title "Dark SaaS Landing Page" \
  --category "Landing Page" \
  --tool "v0" \
  --free \
  --prompt-file "/tmp/prompt.txt"

# Add premium prompt with SupportKori
python3 scripts/manage_prompts.py add \
  --title "Full-Stack Micro-SaaS" \
  --category "Micro-SaaS" \
  --tool "Universal" \
  --price-bdt 49 \
  --supportkori "https://www.supportkori.com/mhr
```

8. Phased Execution Roadmap & Verification Milestones

Phase 1: Types & Seed Data Layer (Wallpapers & Prompts)

Author `src/types/wallpaper.ts` and `src/types/prompt.ts`. Populate `data/wallpapers.json` (5 flagship 8K/OLED bundles) and `data/prompts.json` (8 rich free SuperDesign-style prompts + 5 SupportKori premium prompt packs).

`Deliverables: TypeScript interfaces & seed JSON databases.`

Phase 2: Dual Backend REST API & 2FA Mutation Protection

Register Express endpoints in `server.ts` and Cloudflare Pages Functions in `functions/api/wallpapers.ts` and `functions/api/prompts.ts`. Gating all POST/PATCH/DELETE calls behind Telegram 2FA session verification.

`Deliverables: Dual-environment API handlers with strict token enforcement.`

Phase 3: Storefront UI Pivot (`/products`, `/wallpapers`, `/prompts`)

Overhaul `src/pages/Products.tsx` with dual tabs: **Wallpapers (8K & OLED)** and **AI Design Prompts (SuperDesign Giveaways & SupportKori)**. Equip prompts with 1-click clipboard copy, tool badges, and direct SupportKori checkout buttons.

`Deliverables: High-converting, responsive storefront UI.`

Phase 4: Admin Dashboard Expansion (`src/pages/AdminDashboard.tsx`)

Add "Wallpapers" and "Prompts" management tabs to AdminDashboard. Provide live data tables, status toggles, deletion triggers, and full creation drawers for both asset types.

`Deliverables: Telegram 2FA-secured manual creation interface for Mahir.`

Phase 5: Autonomous AI Management Tooling

Finalize `scripts/manage_wallpapers.py` and `scripts/manage_prompts.py` with atomic file writing, schema validation, and CLI commands for automated catalog maintenance.

`Deliverables: Standalone Python management scripts for Sanctuary.`

Phase 6: Navigation, App Routing & Production Build Audit

Update `src/App.tsx` and `src/components/Layout.tsx`. Run TypeScript compiler and Vite production build (`npm run build`) to confirm zero type errors or bundling warnings.

`Deliverables: 100% green build, deployment-ready bundle.`

9. Security, Operational Safeguards & Financial Model

Domain	Standard / Policy	Verification Mechanism
Micro-Transactions	SupportKori Bangladeshi Gateway	Seamless bKash/Nagad checkout links; zero server payment state overhead.
Global Monetization	Gumroad 100% OFF Coupons	Dynamic single-use coupon minting via Adsterra sponsor progression.
Catalog Integrity	Atomic JSON Transactions	Scripts use atomic rename techniques to prevent file corruption during writes.
Access Security	Telegram Bot 2FA Session Pin	Only authenticated Telegram ID `8941576242` can receive admin PIN codes.

Architectural Sign-Off: Designed for autonomous execution by Sanctuary Core (ThinkPad X270 home server, Ubuntu 26.04) under the direction of Mahir Faisal (MHR3D). Ready for immediate multi-agent deployment.
